

Folegandros

Folegandros

Biophilic design, reflecting biophilia, meaning the love of life and living things, is an approach to spaces, places, and environments with a connection to the natural world. Folegandros, emulating the natural beauty of stone, encourages that same connection by adding a touch of nature to any design. We actively take steps to carbon neutrality, the biophilic attachment to the natural world is exemplified by efforts to preserve it.
